OPIOID CONSENT

I understand that the common side effects of opioid therapy include nausea, constipation, sweating, itching, dry mouth and rash. Drowsiness may occur when starting opioid therapy or when increasing the dosage. I agree to refrain from driving a motor vehicle or operating dangerous machinery until such drowsiness disappears.

I understand that there is a small risk that I may become addicted to the opioid I am being prescribed. As such, my physician may require that I have additional tests and/or see a specialist in addiction, should a concern about addiction arise during my treatment.

I understand that the use of any mood-modifying substance, such as tranquilizers, sleeping pills, alcohol or illicit drugs (such as cannabis, cocaine, heroin or hallucinogens) can cause adverse effects or interfere with opioid therapy. Therefore, I agree to refrain from the use of all these substances without first discussing it with my physicians. I also understand that I may be discharged from care if I use any of these substances. If I use medicinal marijuana then I will not drive under the influence of cannabis.

I agree to be responsible for the secure storage of my medications at all times. I agree not to provide my prescribed medication to any other person at the result in being discharged as a patient. I also understand that lost or stolen medications will not be refilled until the proper due date.

If I break this agreement, my physician reserves the right to stop prescribing opioid medications for me and may discharge me from care.

I hereby agree that my physician has the authority to disclose the prescribing information in my patient file to other health care professionals when it is deemed medically necessary in the physician's judgment.
